

Baltimore Jewish Community COVID-19 Testing

Obtaining Your Results

1. PCR (24-48 hr) Tests

Results are usually available within 24-48 hours. In the winter months, results from **Thursday night** testing will usually NOT be available before Shabbos.

Morning PCR tests are only sent to the lab at night, so results will not be available the following day at the earliest.

You can access your results here:

<https://results.accureference.com/patientportal/index.html>

You will need to click on “I DO NOT HAVE AN ACCESS CODE” in order to obtain one. You will use the Name, DOB and cell number you listed on the lab form you completed.

You will not be able to access the patient portal until the results are loaded. If you try to access the portal prior to the upload of tests, a pop up will show with “The information you entered does not match with the information we have in our system”.

If you are having difficulty accessing the patient portal after 48 hours please call 908-474-1004, then press 1 and then 1. If you still have an issue, you can email the lab directly at Shimon.lobel@accureference.com or DARIA.LAVER@accureference.com

For any other questions relating to the testing, email jcomm.covidtest@gmail.com

Note: If you were tested with a rapid and were positive, they will NOT also run a PCR test.

2. Rapid Testing Results

If you took a rapid test, you should receive a call with your results in 2-3 hours. If you did not receive a call, you can email rapidtesting@hatzalahbaltimore.org or you can call 443-961-7285
